Report No.:	INC-2024-0417
Date of Incident:	April 12, 2024
Location:	Warehouse Loading Dock B, Fairview Logistics Park
Reported By:	D. Alvarez, Site Supervisor
Witness:	J. Okafor, Forklift Operator

Summary of Events

At approximately 2:40 PM on April 12, 2024, a pallet of packaged goods shifted during unloading at Loading Dock B, striking a storage rack. No injuries were reported. The forklift operator, J. Okafor, was operating the vehicle at the time and immediately stopped work to secure the area.

Witness Statement (J. Okafor)

"I was moving a pallet from the truck to the staging area when I noticed the load was unbalanced. I slowed down immediately, but the top layer of boxes slid off and hit the rack next to me. I stopped the forklift, put on the hazard lights, and called D. Alvarez right away. No one else was in the immediate area at the time."

Supervisor Notes (D. Alvarez)

Area was cordoned off within five minutes of the report. Maintenance inspected the affected rack and found minor cosmetic damage to one support beam; no structural concerns identified. Loading procedures for uneven pallets were reviewed with the shift team the same day.

Follow-Up Actions

- Affected rack section inspected and cleared for continued use.
- Pallet-wrapping procedure reviewed with the loading dock team.
- No injuries reported; no medical attention required.
- Report filed with site safety officer within 24 hours per policy.
